

# Speed Leadership: A New Way to Lead for Rapidly Changing Times

Speed Leadership is a breakthrough in understanding leadership and how to improve leadership capabilities and effectiveness. This practical new approach takes a process view of leadership in preference to the traditional view of leadership based on personality, behaviors, or authenticity. Understanding leadership as processes is a powerful new perspective on what constitutes effective leadership and offers new pathways for meaningful improvement. Leaders with an open mind, a willing heart, and genuine concern for the long-term success of an organization and its stakeholders, will find this book extremely helpful if not life-changing.
